Our extensive inventory is acquired through the careful procurement of fully traceable surplus engines in the aviation marketplace. Turbine Solutions has over 50,000 line items stored in an environmentally controlled 20,000 square foot facility. We are conveniently located mid-way between the Tampa and Orlando, Florida metropolitan areas.

Our knowledgeable staff is comprised of individuals with major OEM, airline and military technical experience. These technically proficient personnel, committed to the highest possible quality standards, coupled with our extensive resources can provide the resolution to your most urgent requirements.

Customer satisfaction is our first priority. When you have a problem, we can deliver the solution you need . . . today.

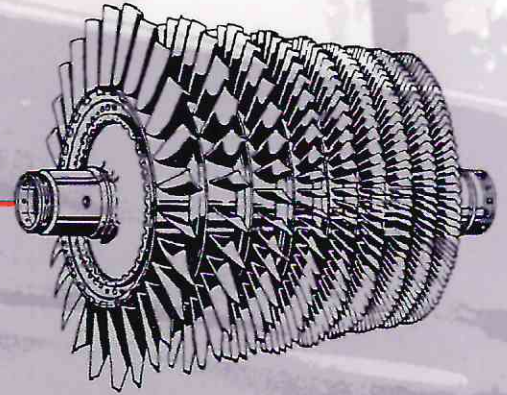

We carry a full line of turbine blades, discs, vanes, main engine bearings, main gear boxes and major engine casings. We also stock other engine parts and components so your A.O.G. time is kept to a minimum.

## ***Specializing in P&W JT8D engines***

- ***Same day shipping on most items***
- ***Worldwide service***
- ***Dynamic inventory of parts and components***
- ***Superior material handling***

## Turbine Solutions

Our commitment to excellence enables us to provide the highest quality service world wide. Your parts will be on the way to any part of the globe within hours of receiving your order.

Turbine Solutions is continually seeking to acquire engines, accept consignments and purchase surplus inventory. Through these functions we are able to provide our customers with a broad range of available inventory.

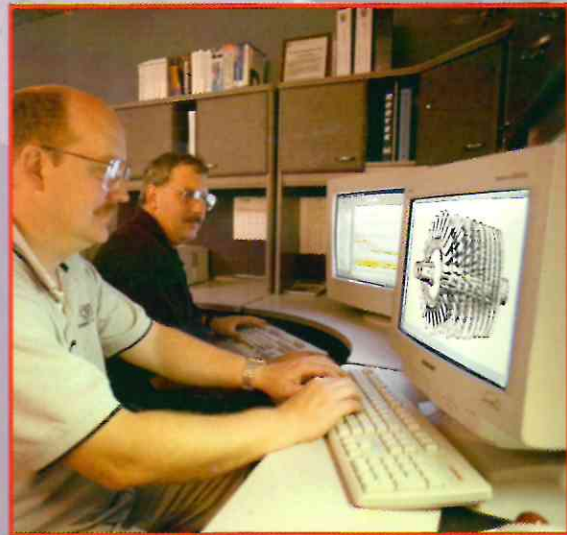

Scott Barbour  
Chairman, CEO

*Our commitment to you, our valued customers, is to achieve your total satisfaction. Turbine Solutions will not settle for providing anything less than the best in quality and service. We want to make your job easier, your maintenance program more cost effective, keep your aircraft in service, and earning money in the air. Our pledge to you is "to meet or exceed your expectations the first time, on time, and every time with zero defects."*

Our inventory is carefully received and inspected by professionals with years of experience and credentials in the aircraft industry. No part is accepted unless it meets our standards which often exceed F.A.A. requirements. Complete traceability, on all material and parts to their last regulated F.A.A. or O.E.M. source, assures you of quality when ordering from Turbine Solutions.

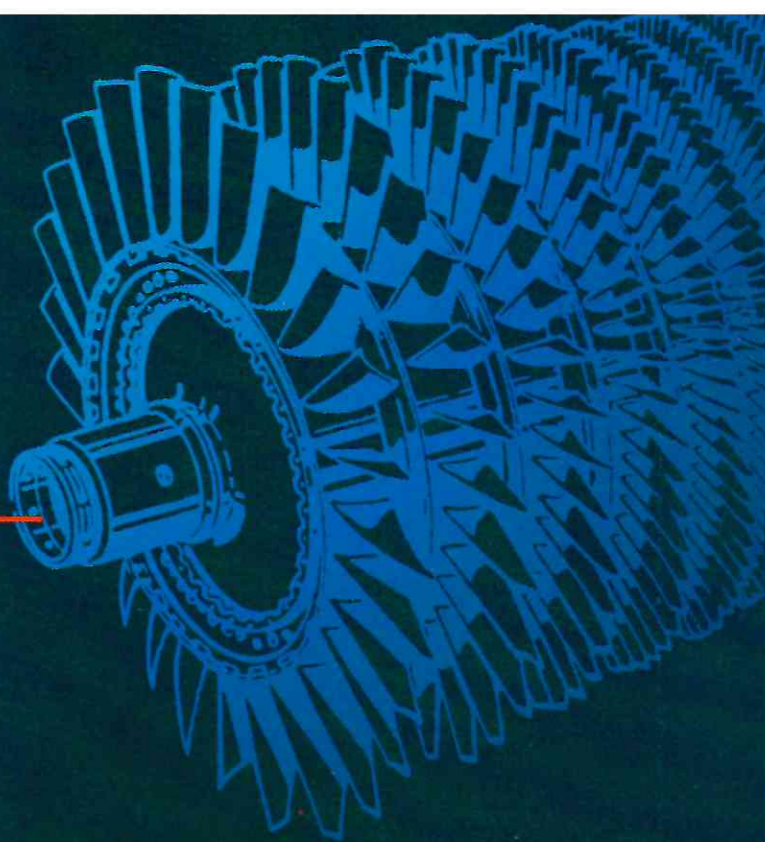

Turbine Solutions' technical advantage is a state-of-the-art information system, complete with manual updates and service bulletins online. You will find our staff to be friendly, knowledgeable and willing to help you find a solution.
