TurbineWorks Supplier Audit Form

* Only complete if you are not certificated/accredited by/to an acceptable quality system

	Υ	N	N/A
1. Quality System and Manual			
A. Is there an established quality system and a quality manual?			
B. Is the quality manual available to appropriate personnel?			
C. Is the quality system documentation kept current and readily			
available to employees, customers, auditors or designee(s)?			
D. Does the quality control manual include a detailed description			
of:			
1) the organization and relationship of the QC department to the rest of the organization?			
2) the assignment of personnel by title, for specific functions within			
the quality system?			
3) the revision control system for the quality system			
documentation?			
4) record keeping system?			
5) training requirements and records?			
6) shelf life control system?			
7) control of incoming discrepant parts and supplies?			
8) receiving inspection procedures?			
9) test and inspection equipment calibration program?			
10) storage facilities and specifications?			
11) part identification system?			
12) environmental controls?			
13) inspection stamp control?			
14) self-audit/evaluation program?			
15) corrective action process			
2. Self-Audit/Evaluation Program			
A. Is there an established documented self-audit/evaluation			1
program, which identifies who within the company is responsible			
for conducting self-audits, the frequency of audits, audit			
documentation and corrective action?			
3. Facilities			•
A. Does the storage areas provide:			
adequate space and appropriate racks to prevent damage or			
mishandling?			
adequate security from unauthorized access?			
3. segregation of aircraft from non-aircraft parts?			
4. segregation of serviceable from non-serviceable parts?			
4. Training and Authorized Personnel			
A. Are personnel who perform inspection, shipping and receiving			
functions properly trained?			
B. Are inspection personnel properly authorized?			
C. Are both formal classroom and on-the-job training documented and maintained?			
D. Is a roster of personnel authorized to perform inspection functions maintained?			
E. Does training program address unapproved and counterfeit parts?

TurbineWorks Supplier Audit Form

5. Procurement A. Does the system assure that parts procured conform to the customer's documentation requirements? B. Does the quality system assure that parts conform to the customer's purchase request and that deviations are disclosed and approved by the customer? C. Does the system require the distributor/dealer to maintain a list of approved suppliers and a quality history for each source? D. Does the quality system assure that parts procured for sale: 1) which are known to have been subjected to conditions of extreme stress, heat or environment are identified? 2) that all represented Airworthiness Directives (AD's) which have been accomplished are documented? 3) that are identified as overhauled, repaired or modified have all appropriate signed and dated documentation? 6. Receiving Inspection A. Does the quality system provide for a visual inspection of all items received and accompanying documentation? B. Is there a procedure for reporting unapproved parts in accordance with FAA Advisory Circular 21-29? C. Is there an accountability system in place to control stamp issuance, usage and replacement? 7. Measuring and Test Equipment A. Is there an effective calibration program for test equipment? 8. Material Control A. Is material handled in an appropriate manner and is the material protected from damage & deterioration? B. Is batch/lot control maintained for parts so identified by the manufacturer?
